Enriching Production-Åke Sandberg 1995 This text aims to present and discuss the innovative Volvo Uddevalla plant, comparing it to other plants - Japanese lean ones and others. The starting point for the book is Volvo's dramatic decision to close its Uddevalla and Kalmar plants, and the debate that followed this decision, both in Sweden and abroad. Both plants were pioneers of the possibilities to unite productivity and the good work, but, following the announcement of their closure, researchers and practitioners in the field of industrial organization from many countries asked why they closed, how they compared with other production concepts, and whether we now see an end of an alternative to Japanese lean production.

The Millionaire Next Door-Thomas J. Stanley 2010-11-30 How do the rich get rich? An updated edition of the “remarkable” New York Times bestseller, based on two decades of research (The Washington Post). Most of the truly wealthy in the United States don’t live in Beverly Hills or on Park Avenue. They live next door. America’s wealthy seldom get that way through an inheritance or an advanced degree. They bargain-shop for used cars, raise children who don’t realize how rich their families are, and reject a lifestyle of flashy exhibitionism and competitive spending. In fact, the glamorous people many of us think of as “rich” are actually a tiny minority of America’s truly wealthy citizens—and behave quite differently than the majority. At the time of its first publication, The Millionaire Next Door was a groundbreaking examination of America’s rich—exposing for the first time the seven common qualities that appear over and over among this exclusive demographic. This edition includes a new foreword by Dr. Thomas J. Stanley—updating the original content in the context of the financial crash and the twenty-first century. “Their surprising results reveal fundamental qualities of this group that are diametrically opposed to today’s earn-and-consume culture.” —Library Journal

Sign Wars-Robert Goldman 1996-05-21 Television has become so saturated with commercials that it is difficult at times to tell the different images apart, much less remember or care about them. But, on closer look, television commercials can tell us a great deal about the interplay of market forces, contemporary culture, and corporate politics. This book views contemporary ad culture as an ever-accelerating war of meaning. The authors show how corporate symbols or signs vie for attention-span and market share by appropriating and quickly abandoning diverse elements of culture to differentiate products that may be in themselves virtually indistinguishable. The resulting "sign wars" are both a cause and a consequence of a media culture that is cynical and jaded, but striving for authenticity. Including more than 100 illustrations and numerous examples from recent campaigns, this book provides a critical review of the culture of advertising. It exposes the contradictions that stem from turning culture into a commodity, and illuminates the impact of television commercials on the way we see and understand the world around us.
