Alma Flor Ada 2009-12-15 A third grader realizes the importance of her name in this classic story of heritage and self-identity. For María

Isabel Salazar López, the hardest thing about being the new girl in school is that the teacher doesn't call her by her real name. "We already have two Marías in this class," says her teacher. "Why don't we call you Mary instead?" But María Isabel has been named for her Papá's mother and for Chabela, her beloved Puerto Rican grandmother. Can she find a way to make her teacher see that if she loses her name, she's lost the most important part of herself?

teaching for understanding, not rote memorization. Readers will learn * the components of the UbD framework; * the fundamentals of language and language development; * how to use diversity as a valuable resource for instruction by gathering information about students' background knowledge from home, community, and school; * how to design units and lessons that integrate language development with content learning in the form of essential knowledge and skills; and * how to assess in ways that enable language learners to reveal their academic knowledge. Student profiles, real-life classroom scenarios, and sample units and lessons provide compelling examples of how teachers in all grade levels and content areas use the UbD framework in their culturally and linguistically diverse classrooms. Combining these practical examples with findings from an extensive research base, the authors deliver a useful and authoritative guide for reaching the overarching goal: ensuring that all

students have equitable access to high-quality curriculum and instruction.

While technological change has periodically altered and advanced the ways humans process and transmit knowledge, for the last 100 years the media with which we produce, transmit, and record ideas have multiplied in kind, speed, and power. Saturation in media is provoking a crisis in how we perceive and understand reality. Media become inflationary when the scope of their representation of the world outgrows the confines of their culture's prior grasp

of reality. We call the resulting concept of reality that emerges the culture's medialogy. Medialogies offers a highly innovative approach to the contemporary construction of reality in cultural, political, and economic domains. Castillo and Egginton, both luminary scholars, combine a very accessible style with profound theoretical analysis, relying not only on works of philosophy and political theory but also on novels, Hollywood films, and mass media phenomena. The book invites us to reconsider the way reality is constructed, and how truth, sovereignty, agency, and authority are understood from the everyday, philosophical, and political points of view. A powerful analysis of actuality, with its roots in early modernity, this work is crucial to understanding reality in the information age.
